6 Advantages of Silicone Profile

Excellent corrosion resistance: resistant to corrosion by ordinary acids, alkalis, and salts.

Excellent light transmittance: The light transmittance of silicone exceeds 80%

Excellent softness, easy to bend, and can be shaped into different shapes for billboards.

Good thermal conductivity: significantly higher than PVC thermal conductivity, can effectively dissipate heat.

Maintain normal softness at -50~150℃ , and will not yellow or age under strong sunlight.
Food grade environmentally friendly material, waterproof, fireproof, anti-tear
SILICONE NEON

The product comes with a built-in lighting source and an integrated extruded silicone rope. The product has a waterproof rating of IP67 and can be jointed to any length. It is a soft atmosphere linear lamp with multiple installation methods: recessed, surface, and suspended. The application for indoor lighting, commercial lighting, outdoor lighting, wall washing lighting, etc...
